

## **Annexure 1**

### **LLF Projects Financing Scope**

#### **Sector allocations:**

Project Financing Funds will be in the following Sectors, as follows:

- (i) within health Sector to be used in the following areas:
  - a. infectious disease eradication and control, with priority given to malaria, polio campaigns, routine immunization and neglected infectious diseases;
  - b. primary health care system strengthening, including primary health care system governance and financing, performance management at both the government and facility levels and service delivery improvement at the facility level.
- (ii) within agriculture Sector to be used in the following areas:
  - a. projects predominantly serving smallholder farmers with production of staple products (livestock and crops)
- (iii) within basic infrastructure Sector to be used in the following areas:
  - a. off-grid rural power generation, transmission and distribution for poor communities;
  - b. small scale water supply and sanitation projects for poor and currently unconnected communities;
  - c. Rural infrastructures to promote digital financial inclusion.

# Summary of key criteria for selecting LLF projects

<b>LLF Vision based Eligible Scope</b>	Focus on the most vulnerable demographic segments (mother, children & infants)	Focus on getting high impact at the "Micro" Level	Focus on communities who are currently "disconnected" from core infrastructure	Focus on supporting communities through self-sustaining solutions	Focus on building economic & social resilience in poor communities
<i>Fundamentals strategic metrics materializing successful impact</i>	# of Lives impacted by the project	# of individuals benefitting from reduced risk of morbidity &/or premature death	# of people connected to the global market	# of people provided with basic amenities and services	# of individuals provided with more stable incomes
<b>Financing scorecard &amp; considerations</b>	Out of Total Financing: LDMC = 65% Vs LMIC= 35%	Sectors Financing split: Health => 20% to 60% Agri. => 20% to 60% Infras. => ≤ 20%	LLF Funding Structure: LDMC => 65%OCR + 35% LLF GRANT LMIC => 90% OCR + 10% LLF GRANT	Maximum allocation to a single country => 20% of total project financing fund	Project Management Fees kept ≤ 10% of LLF total funding
<b>Health key criteria &amp; considerations</b>	Strengthen the primary healthcare system (e.g. Increasing equitable access to quality maternal health services, improving neonatal and childcare services)		Control, treatment, and/or eradication of infectious diseases	Increased access to quality healthcare through healthcare financing	
<b>Agriculture key criteria &amp; considerations</b>	Increase crop productivity for Smallholder farmers	Increase productivity of livestock systems for smallholder farmers & pastoralists	Increase access to and equitable consumption of a nutritious diet	Increase women's empowerment in agriculture	Increase income stability among smallholder farmers
<b>Small Infrastructure key criteria &amp; considerations</b>	Increase access to stand alone sanitation	Increase access to standalone clean power	Increase access to clean water	Promote digital financial inclusion &/or improve mobile communication network coverage	Increase protection from flooding for individuals, housing & community facilities
<b>Key considerations for sorting out candidate projects</b>	<b>RELEVANCE:</b> Project aligns with LLF vision & Poverty reduction strategy of the MC => Country's development status + incidence of poverty in MC development		<b>READINESS:</b> Project is ready to GO ! => Effective delivery + Quality of preparation + Maturity level + Detailed preparation of project implementation + Expected measurable impact	<b>RESULTS:</b> Project can secure an immediate impact on the lives of ordinary men, women and children on the ground => country track record in implementing projects
