JOINING FORCES

WE CANNOT ACHIEVE THIS ALONE AND STRONGLY BELIEVE IN TEAMWORK

With the Government in the lead, we are joining forces to expand coverage and quality of eye health services throughout the countries. Partners include national ministries, the National Program for Control of Blindness (NPCB), non-governmental organizations and community structures – all working together to effectively deliver change. The program will be led by a multidisciplinary National Coordinating Committee made up of key stakeholders in sectors related to the prevention of blindness.

OUR WIDER IMPACT

Your support to the Action Plans will directly contribute to the vision that no person will lose their sight due to an avoidable or treatable condition. Furthermore, as part of the Second Generation of the Alliance to Fight Avoidable Blindness, the leverage is immense. Through stimulating South-South partnerships, the 13 AFAB beneficiary countries will benefit, laying the foundations for strong and sustainable eye health services across the African continent.

SECOND GENERATION
aims to improve the quality of life for visually disabled persons in 13 member countries through accessible eye care services. The program targets to perform cataract surgeries, develop national intervention programs for uncorrected refractive errors, develop glaucoma treatment centers, and initiate diabetic retinopathy programs, and training for eye care staff.

THE OVERALL GOAL:

is to contribute to improving the quality of life of persons with visual disability and uplifting their socio-economic status in IsDB member countries.

THE SPECIFIC OBJECTIVE:

is to provide comprehensive, accessible and sustainable eye care services in the selected member countries

AFAB:

is a partnership program launched by the Islamic Development Bank (IsDB) in 2008, with the aim of using South-South partnerships to prevent and cure vision problems, giving people not just the gift of sight, but a path out of poverty. The First Generation had a tremendous success with thousands of people having their vision restored through successful cataract surgery. This Second Generation ramps up the scale, targeting more eye conditions, building capacity in more countries. The Second Generation is led by the IsDB and the Islamic Solidarity Fund for Development (ISFD).

HOW WE WILL DELIVER THE SECOND GENERATION OBJECTIVES
